INTERNATIONAL PRIMARY CURRICULUM

An Engaging, Rigorous Internationally Minded Curriculum, designed to teach children from the ages of 3-11 throughout the world. Following feedback from St. Edward's Staff and children regarding time and coverage constraints of delivering foundation subjects in isolation, St. Edward's decided it was time to look further afield and explores ways in which schools are bringing learning to life, while ensuring curriculum coverage within the school academic year.

The implementation of IPC has been planned with current priorities of St. Edward's as its core.

St. Edward's Implementation

Following the approval of the implementation of the International Primary Curriculum from our staff, pupils and Governing Body, St. Edward's have taken the plunge and chosen to become part of the International Primary community. In September 2016-17, we will see a route plan implemented across Key Stage One and Two which ensures National Curriculum coverage across each milepost. Subject Leaders will be working closely together to monitor and support teachers and pupils on this journey, in ensuring the best possible outcomes for the pupils of St. Edward's.

This curriculum covers Science, Geography, History, Art, Design Technology and aspects of Physical Education. It is taught with International Mindedness at the centre, and with a clear focus of teaching through the viewpoint of current world affairs.

Parents of St. Edward's play a significant role in developing international Mindedness in our pupils and we look forward to the diverse experiences that parents can share to enrich the learning experience of our pupils.
